

# General info

## Import Field relations with general data

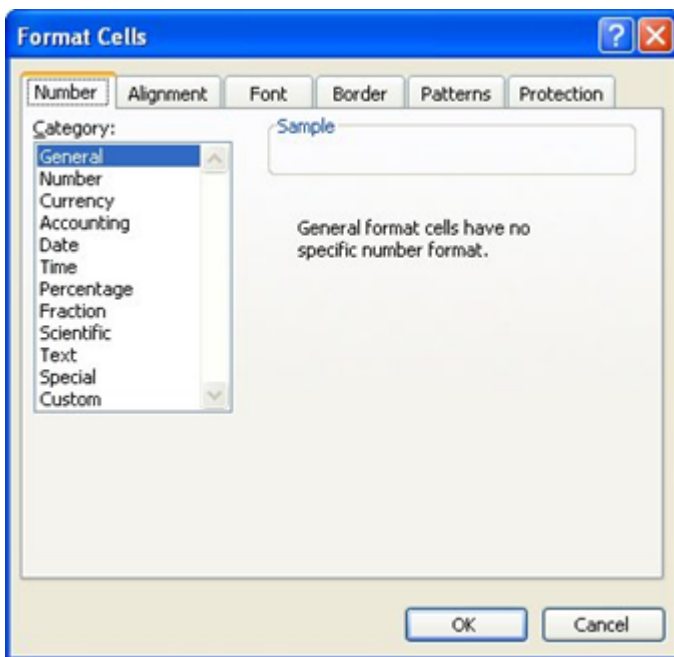

If you filled in the following columns in the Excel file:

- Cost Code
- Currencies
- Product categories
- Units

Then this data must exist in the Administration module.

All fields in the Excel file must be in text format.

For example, if there is a problem after importing inventory with the PartNumber (column C) change the format of this column (Right mouse click on this column, select Format Cells) to the category **General**.

Do not change the top row of the Excel file! If this is changed, the import will fail!
