

How do I copy all certificates in a category?

1. Right-click a certificate category and click **Copy...**
2. Select the location where you want to copy the certificate category to.

The screenshot shows a dialog box titled "Copy category" with a blue header bar containing a close button. The main area is white and contains the text "Select a destination for the copied category." followed by a list of radio button options: Mastex Cruise, Mastex General Cargo, Mastex Guard, Mastex Tanker, Mastex Trader, Mastex Trader II (which is selected with a blue dot), Mastex tug, and MXSuite inlander. At the bottom right, there are two buttons: "Save & close" in blue and "Close" in white.

3. Click **Save & Close.**

The history of the certificates will also be copied.

A location is not displayed during the copying process if:

- the destination has no module Certificates.
- the source has a docking certificate and the destination does not.
