FLGO

FLGO stands for **F**uel, **L**ube and **G**as **O**il. By regularly entering the actual stock and all bunkered quantities, the module FLGO can calculate the consumption of each preferred period. This provides insight into consumption and costs.

- How do I enter the actual values?
- How do I enter received / delivered bunkering?
- How can I see my consumption?
- How do I edit historical FLGO values?
- How do I create a new FLGO item?

How do I enter the actual values?

1. Click on **Update values.**
2. Enter the actual measured values and click on **Save & close.**

Fill bunkering								□ ×

How do I enter received / delivered bunkering?

Received

1. Click on **Fill bunkering.**
2. At **Operation type**, select **Received** and enter the received quantities.
3. Click on **Save.**

Delivery

1. Click on **Fill bunkering.**
2. At **Operation type**, select **Delivered** and enter the delivered quantities.
3. Click on **Save.**

How can I see my consumption?

1. Click on **Print.**

2. Select a **Start period** and **End period.**
3. Select a **Location.**
4. Click on **Preview.**

How do I edit historical FLGO values?

1. Go to the module **History.**
2. Select **FLGO.**
3. Click on **Search** to search for the incorrect value.
4. Right-click on a line.
   - Click on **Edit...** to edit a line.
   - Click on **Delete...** to delete a line.

How do I create a new FLGO item?

1. Go to the module **Settings.**
2. Click on **FLGO items.**
3. Click on **New.**
4. Enter the mandatory fields and click on **OK.**

If the desired unit cannot be selected, the MXSuite administrator can add it.
