AssetsPartsCategories

General

To have a proper import of the parts in the correct category the ParentCategories column must be filled accordingly.

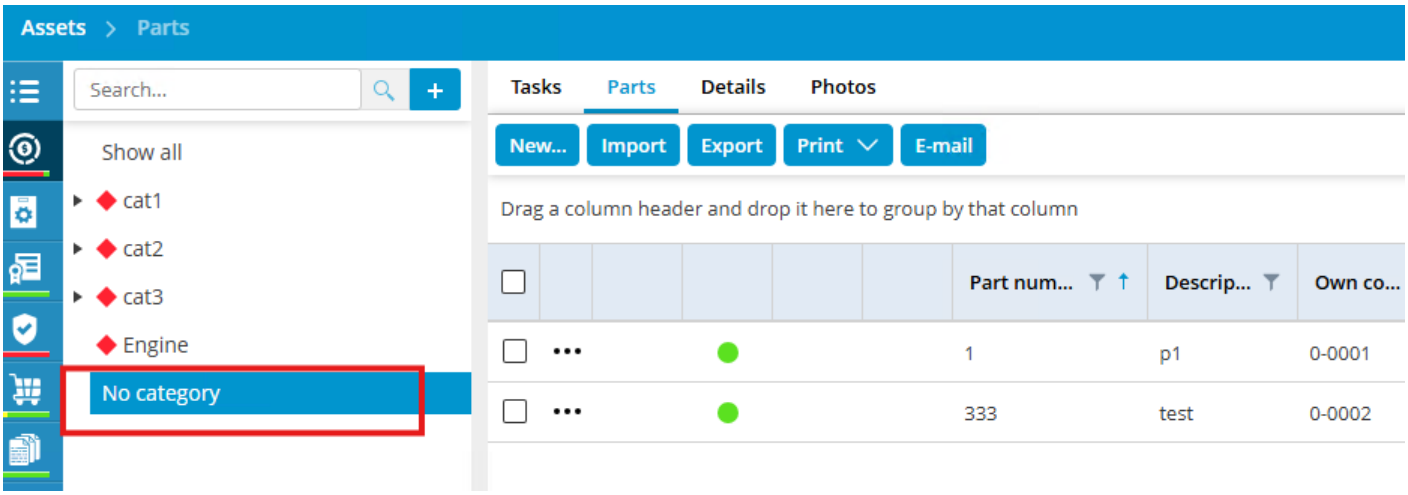

Field	MAX Characters	Required	Comment
ParentCategories	128	X	The category (equipment) name as defined in the Assets module. This should exactly match the name of the category. (e.g. 700 Inventory > 770 OFFICE)
Owncode	50	X	The owncode is a unique field, and this number will be used to update the part with the same owncode or import the part if the owncode is not known for the entire fleet.

	A	B	C
1	ParentCategories	Owncode	
3	cat1	029-43566	
4	cat1 > cat1.1.1	6789909-23	
5	cat1	1-0001	
6	cat1 > cat1.1.1	232457	
7	cat1	87654-46	
8	cat1 > cat1.1.1	0-1000-0001	
9	cat1 > cat1.1.1	0-1000-0002	
10	cat1	1-0006	
11			

Important

If this sheet is empty during the import, the Parts will fall into No Category section. To change this after the import - either manually assign each part to a category or do an export of these specific parts and have the AssetsPartsCategories sheet completed properly with info:
