Update counters via API

ExternalCounters/UploadCountersHistory

Using this action a list of counter values can be updated.

This action requires the "Update counters" user right and a valid MXSuite license.

Body parameters

A list with this object type:

```
{
  name: string,
  locationName: string,
  value: number,
  timeStamp: Date
}
```

> The entry is ignored if:
> - there is no location with that name.
> - there is no counter with that name for that location.
> - there is already an entry added for that counter in that location with the same value and timestamp.
