

# Set the regional settings of MXSuite

If you want to use local formatting for date and time, but also for the formatting of the numbers, you can apply the region or cultural setting to the IIS site.

- 1. Open **IIS**
- 2. Select the **site** that should be changed
- 3. Open **.NET Globalization**

- 4. Select the **Culture** and **UI Culture** and set **Enable Client Based Culture** to **True**

▼ Culture	
Culture	Dutch (Netherlands) (nl-NL)
Enable Client Based Culture	True
UI Culture	Dutch (Netherlands) (nl-NL)

- 5. Apply the settings (right column)
- 6. Restart the website
