

Use of Dymo LabelWriter printer in MXSuite

In MXSuite you have the option to print labels for a Dymo Labelwriter.

MXSuite V3:

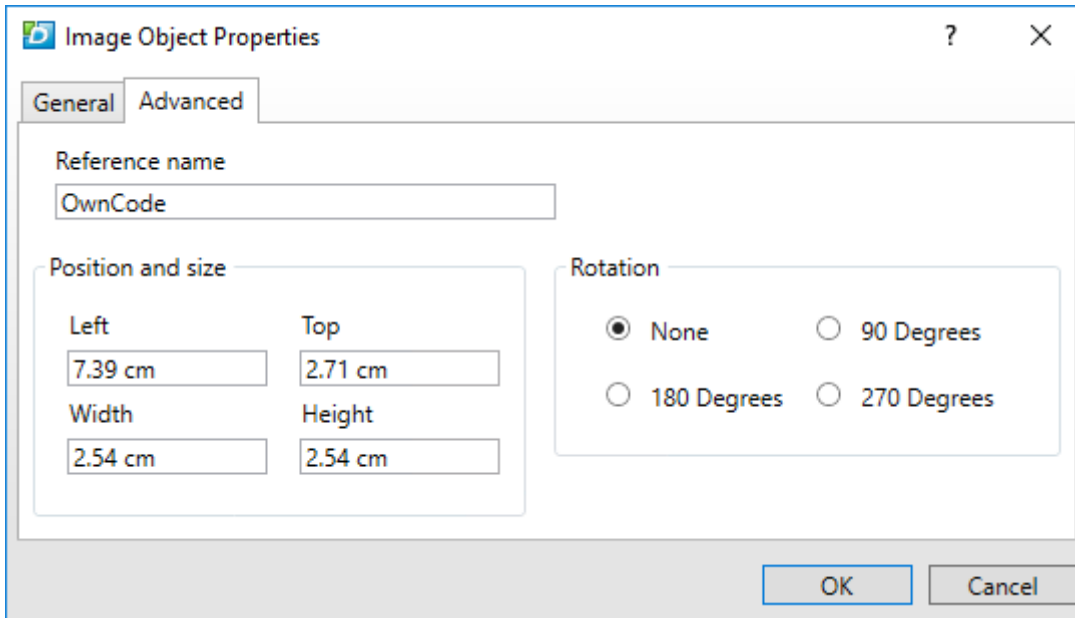

- you can also use the latest Dymo Connect **on the client** (if that LabelWriter type is supported).
- requires the web service which you can enable during installing Dymo Connect

The following reference names are used to create the label template:

Label	Type	Reference name	Additional info
Part number	Barcode	PartNumber	Code 39 recommended
Company	text	Company	Presented as MXSuite - [Companyname]
Location	text	Location	Name of License
Name	text	Name	Description of part
Part number	text	PartNumberText	
Own code	text	OwnCodeText	
Storage/Box	text	Storage/Box	both fields storage and box are shown
QR code	image	OwnCode	The following icon is used to generate QR 

The Reference name of the objects can be set up as following:

- Right mouse click on the text / icon
- Choose **Properties**
- Go to tab **Advanced**
- Fill in the text box of **Reference name**

The label template is built using the label template: **Shipping** which has the label size of **101mm x 54mm**
