

Use of Dymo LabelWriter printer in MXSuite

In MXSuite you have the option to print labels for a Dymo Labelwriter.

MXSuite V2:

- the max allowed version of Dymo software is: Dymo Labelwriter 8.7.5
- download that version [here](#) (right mouse click at the version > save as..)

MXSuite V3:

- you can also use the latest Dymo Connect (if that LabelWriter type is supported).
- requires the web service which you can enable during installing Dymo Connect
- the DYMO software should be installed on the IIS server!

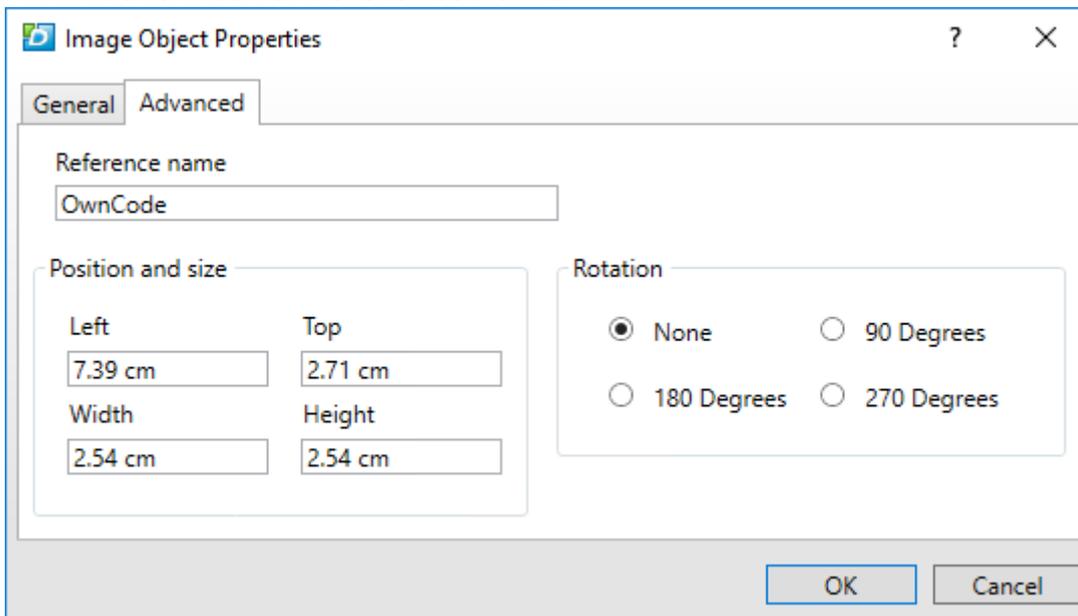

The following reference names are used to create the label template:

Label	Type	Reference name	Additional info
Part number	Barcode	PartNumber	Code 39 recommended
Company	text	Company	Presented as MXSuite - [Companyname]
Location	text	Location	Name of License
Name	text	Name	Description of part
Part number	text	PartNumberText	
Own code	text	OwnCodeText	
Storage/Box	text	Storage/Box	both fields storage and box are shown

QR code	image	OwnCode	The following icon is used to generate QR image-1679320635350.png
---------	-------	---------	--

The Reference name of the objects can be set up as following:

- Right mouse click on the text / icon
- Choose **Properties**
- Go to tab **Advanced**
- Fill in the text box of **Reference name**

The label template is built using the label template: **Shipping** which has the label size of **101mm x 54mm**
