

How do I know which maintenance activities to perform?

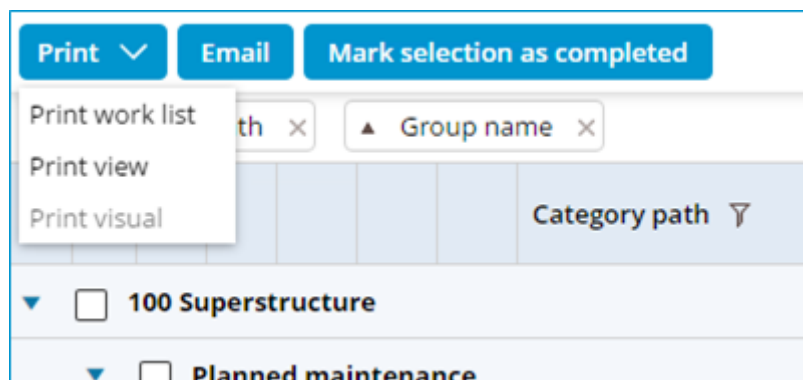

Click on **Work list**.

MXSuite will display a list of maintenance tasks that need to be performed. The structure of this list depends on the view settings.

The list of tasks can be printed in two ways.

- Click **Print view** to print the current view.
- Click **Print work list** to print the current job with a wider view. More options are available for this print, such as ticking a box to indicate that a task has been completed and adding a comment to a task.

- Here is an example of a printed work list.

Work list

Docu MXSuite | Mastex Trader | IMO 12345678

Group / Part	Due date	Comments
100 Superstructure > 110 Hull > Docking		
<input type="checkbox"/> running hour task	132034 running hours	
200 Engines & propulsion > 210 Main engines > 210.1 Main Engine PS > TC		
<input type="checkbox"/> Inspect turbocharger	601613 running hours	
200 Engines & propulsion > 210 Main engines > 210.1 Main Engine PS > Planned maintenance		
<input type="checkbox"/> Check lub oil pressure low alarm	598913 running hours
